

2022-2023 Sam Houston

Shameka Johnson, Principal
revised 6 May 2022

“The first future is the one related to time; the second is the one you can envision; the third future is the one you make happen.”

TFS 2022 – 2023 Sam Houston Action Plan

6 May 2022

The education profession is in distress because it is designed as a system that no longer meets the needs of students (and it never met the needs of all students). Having moved away from accountability and achievement outcomes, the schools and districts are struggling to find a path forward that will accelerate learning and close the achievement gap.

Third Future Schools has been able to weather the challenges of the pandemic and the general confusion in the rest of the field because our system is based on some fundamentally different principles of operating and because we have an intense focus on closing the achievement gap and preparing students for a Year 2035 world and workplace. We will stay the course. That means we will continue to focus on high-quality instruction in the LSAE model and improved implementation of the Dyad concept.

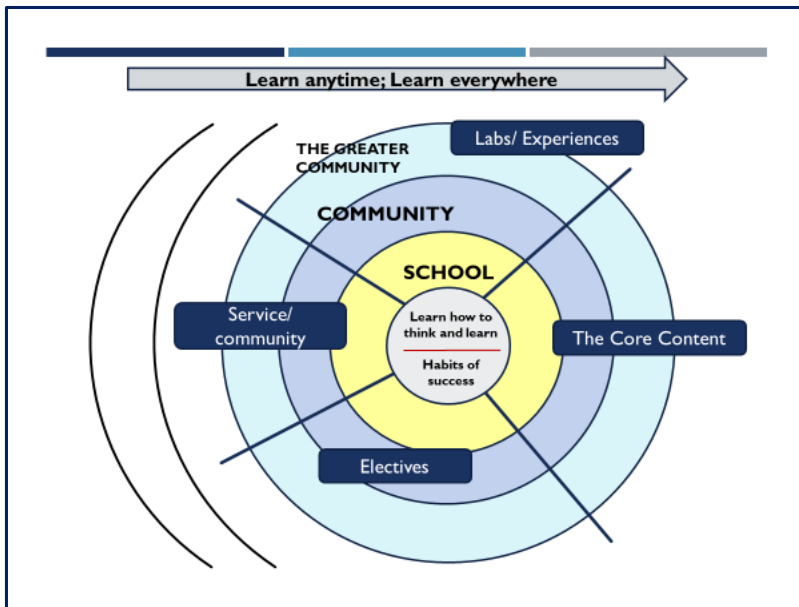

Still, we will have to consider the changing workforce and the manifestation of those changes that challenged schools and districts in the 2021-2022 school year (see the TFS staffing plan dated 4 March 2022 for more detail). Thus our 2022-2023 Action Plan will include steps to support our teachers and other initiatives to ensure the continuity of strong instruction for our students. The fundamental concept of our staffing plan going forward is to differentiate the teacher tasks and responsibilities and redistribute many of the tangential functions to learning coaches, apprentice teachers, and consulting support personnel.

For the 2022-2023 school year, our overarching goals will be to: 1) strengthen the quality of instruction, 2) continue to improve the implementation of the Dyad concept, and 3) make adjustments to our staffing model that will better support teachers and help us create a modern workforce.

An opportunity to reimagine education

We remain mindful that we are providing proof points for a new education system. Our instructional model, Dyad concept, and staffing plan are unique and based on the principles of a new education system.

We are one of the few networks or districts that is both closing the achievement gap and preparing students well for a Year 2035 workplace and world. Thus, we will continue to approach the work with the courage of our convictions and the sense of urgency our students need us to have.

KEY ACTIONS

1) Grow staff capacity to provide the highest quality instruction

Third Future schools are able to get much higher-than-average academic growth because of the high quality of the teachers' instruction. Indeed, the quality of instruction is the number one variable in improving the academic performance of any school. Hence, continually improving the quality of instruction will continue to be a key action of all of our schools.

Our TFS-Ready characteristics (Appendix B) and our spot observation form (Appendix C) will continue to drive our instructional improvement strategy.

Indicators of success:

- 70% of the scores on spot observations conducted in December by an independent review team will be proficient or higher; that percentage will increase to 80% in May 2023.
- 80% of the teachers will be proficient or higher in the delivery of high-quality instruction as measured by that section in the teacher evaluation rubric. [The Principal and Assistant Principal will evaluate all teachers using the new evaluation system.]

Specific actions:

- Train teachers on the TFS-Ready characteristics during summer orientation and professional development days
 - Professional development is tied to TFS-Ready characteristics and includes effective lesson objectives and demonstrations of learning, multiple response strategies, “first, good instruction”, differentiating instruction, and the use of technology to improve instruction
- Train teacher on the LSAE instructional model and the Dyad concept
- Provide on-the-job coaching regularly (almost daily) and written feedback at least once a month for every teacher using the TFS spot observation form
- Conduct effective PLCs that focus on data and specific intervention strategies
- For select teachers, provide expert professional development on literacy and how to teach reading to students who are behind in proficiency
- All K-3 teachers, the Special Education Teacher, the Reading Interventionist, and administrators will complete the Texas Reading Academy by year 2023.

Commented [1]: @zach.craddock@thirdfuture.org is this what you are looking for in this section?

2) Implement the LSAE model with fidelity

This will be the first year with LSAE Curriculum Developers (LCDs). We will have to ensure the LSAE model is still executed with fidelity and that the LSAE assignment and activities not only meet our expectations, but that the teachers collaborate in ways that strengthen the model and the quality of their instruction. Additionally, we have to continue to improve other key aspects of the model – learning coaches, team centers, DOL record keeping, LSAE grades, and extended LSAE.

Indicator of success:

- Sam Houston will receive a proficient or higher score on the LSAE learning rubric assessed in December 2022 and May 2023. [The CEO, Executive Director of Schools, and the School Leadership Team will each score the school; the final score will be an average of the three scores.]

Specific actions:

- Revise and improve the LSAE rubric by 1 August 2022
- Create and monitor the repository for the LSAE lessons and assignments created by the LCDs.
- Train administrators and teacher leaders on the use of the LSAE rubric by 1 September 2022
- Coach and provide feedback to teachers regularly on the differentiated learning criteria of the spot observation form
- Train staff on effective implementation of the LSAE model by 1 September 2022
- Assess the school two times a month on how well the LSAE model has been implemented
- Publish the LSAE implementation data every month

LEARNING

SECURING

SECURING

ACCELERATING

ENRICHING

- Use monthly data to identify focal points for campus wide coaching

Commented [2]: @zach.craddock@thirdfuture.org

3) Successfully implement the 2022-2023 TFS staffing plan

This year we will expand the number of 1C2L teachers and employ Teacher Apprentices for the first time. We will also revise the job description for Learning Coaches and expect more support and responsibilities from them. There will have to be strong sense-making, coaching, and monitoring from administrators and teacher leaders.

Indicator of success:

- In the climate survey conducted in December 2022 and May 2023, at least 80% of the teachers agree or strongly agree that the staffing plan helps them provide better quality instruction.

- In the climate survey conducted in December 2022 and May 2023, at least 70% of the Teacher Apprentices and Learning Coaches agree or strongly agree that they understand their responsibilities and have the support and coaching they need to perform those responsibilities well.
- Of the Teacher Apprentices and Learning Coaches employed on October 1, 2022, at least 70% decide to return.

Specific actions:

- Develop and implement a Teacher Apprentice and Learning Coach onboarding procedures
- Implement a Teacher Apprentice and Learning Coach evaluation system
- Train teachers and administrators on the Teacher Apprentice and Learning Coach responsibilities and how to coach them by 1 August 2022
- Create new spot observation forms for Teacher Apprentices and Learning Coaches
- Train administrators, teachers, Teacher Apprentices, and Learning Coaches on the use of new spot observation forms for Teacher Apprentices and Learning Coaches

4) Successfully implement the new teacher evaluation and compensation system

This will be the second year of the new teacher evaluation and compensation system. A rigorous evaluation system will help teachers do their best work and help the school leaders provide effective support. It will help the entire network hold itself accountable for clearly defined outcomes.

The purpose of our evaluation system is to improve teacher effectiveness in order to narrow opportunity gaps and prepare students for a Year 2035 workplace and world. The information derived from the evaluation system will be used to align professional development, teacher recruitment and retention, and teacher compensation.

Indicator of success:

- In the 2022-2023 school year, 100% of the eligible teachers receive an evaluation rating, using the metrics of the new evaluation system.
- The “target distribution” is followed with no more than 40 percent of the teachers in the Network in the “Distinguished” category.
- No more than 45 percent of the teachers receive a rating in the “Proficient” category.

Specific actions:

- Establish a data platform to keep track of all of the evaluation metrics
- Train and certify evaluators of the teachers by 1 September 2022
- Train teachers on the evaluation system by 1 August 2022 or within 30 school days from the time a new teacher begins work (if they arrive after the start of the school year)
- Evaluate all teachers using the procedures and metrics outlined in the teacher evaluation and compensation system document

5) Expand implementation of the Dyad model

We call the acquisition of knowledge, perspective, and experiences the Dyad Concept. The Dyad concept has been part of the Third Future Schools vision since the opening of our first school. As a result of our growth and receiving several high-dollar grants, we are in a position to jumpstart this concept. We will significantly expand the opportunities students will have to enjoy the arts, athletics, creative pursuits, and other learning experiences.

In the 2022-2023 school year, we will also create and administer BOY, MOY, and EOY assessments in the Art of Thinking classes (3rd grade through 8th grade). These exams will be developed for each dyad.

Indicator of success:

- By June 2023, 85% of the students in grades 5 through 8 will complete at least 50% of the Dyad requirements.
- TFS administers BOY, MOY, and EOY assessments in the Art of Thinking classes (3rd grade through 8th grade).
- By June 2023, at least 65% of the students earn a proficient or higher score on the end-of-year Art of Thinking exam.

Specific actions:

- Implement courses to support problem-solving projects, community service projects, and other Dyad requirements
- Engage community members and groups to provide student experiences related to DYAD requirements
 - Build database of community collaborators

- Send students on field trips, out-of-state trips, and out-of-country travel (as budget allows)
- Establish infrastructure and processes to track completion of student DYAD requirements
- Create BOY, MOY, and EOY assessments for each Dyad (3-4, 5-6, 7-8)

6) Strengthen the leadership density of Third Future Schools

As we grow, we need to expand leadership density to ensure all parts of the network are adhering to our core beliefs and working at high levels. We also need to invest in teacher leaders so that they can become trainers and mentors for teachers new to the network and to our model.

Indicator of success:

- 65% of the staff will receive a Proficient 1 or higher rating on the leadership competency as assessed by the evaluators during the teacher evaluation process conducted in the spring of 2023

Specific actions:

- Develop a leadership rubric to assess all teachers (use the rubric from the distinguished teacher evaluation process as a base) by 1 August 2022
 - Train teachers on the leadership rubric by 1 October 2022

- Assess teachers mid-year and end-of-year on the leadership rubric
- Train administrators on levels of leadership model and on leadership competencies during summer leadership training
- Use the System Assessment Rubric (which includes a leadership section) to coach administrators and to assess progress every quarter
- Select teacher leaders from each school and provide intensive professional development on leadership on leadership, LSAE model, and the Dyad concept
- Attend campus level leadership meetings
- Leaders on campus will help lead in the following areas: Testing, New Teacher Academy, Staff Culture and Climate, Parent and Community Engagement, Operations

Testing

- a. *New Teacher Academy*
 - b. *Staff Culture, Student Culture*
 - c. *Parent and Community Engagement*
 - d. *Operations*
 - e. *Technology*
 - f. *Systems of Instruction (such as planning PD)*
 - g. *Student Attendance*
- The above areas will include one Lead Teacher each, so you must be willing to support what is needed, not just what “speaks” to you.*

2022-2023 Student Achievement Goals

As a result of the preceding actions, student academic proficiency will increase. Specifically, Third Future Schools establishes the following student achievement goals:

Goal 1 – Reading proficiency

Goal 1a: In the 2022-2023 school year, SHES students will grow 1.7 times the average U.S. growth in reading as measured by the NWEA MAP assessment and using the mean RIT score for each grade, 2-8.

Goal 1b: In the 2022-2023 school year, 75% of the students in grades K-3 will demonstrate typical or above typical growth in DIBELS at the end of the year.

Goal 1c: 55% of the 4th grade will be above the 50th percentile in Reading as measured by the NWEA MAP assessments.

Goal 2 – Math proficiency

Goal 2a: In the 2022-2023 school year, SHES students will grow 1.7 times the average U.S. growth in math as measured by the NWEA MAP assessment and using the mean RIT score for each grade, 2-8.

Goal 2c: 55% of the 4th-grade students will be above the 50th percentile in math as measured by the NWEA MAP assessments.

Goal 3 – Science proficiency

Goal 3a: In the 2022-2023 school year, SHES students will grow 1.7 times the average U.S. growth in science as measured by the NWEA MAP assessment and using the mean RIT score for each grade, 2-8.

Goal 3c: 55% of the 4th-grade students will be above the 50th percentile in science as measured by the NWEA MAP assessments.

Goal 4 – English Language Proficiency

Goal 4a: In the 2022-2023 school year, SHES’s median growth percentile on the STAAR exam for English Language Arts for **English Language Learners** will exceed 55.

Goal 4b: In the 2022-2023 school year, Third Future Schools’ median growth percentile on the STAAR exam for Math for **English Language Learners** will exceed 55.

Goal 5 – Critical Thinking Skills

65% of the students in grades 3 through 8 will be proficient in critical thinking as measured by the Third Future Schools end-of-year Art of Thinking exams.

Appendix A: Eight Principles of a New Education System

(revised Jan 2022)

1. **Learning is increasingly focused on how to think and how to learn.** What students need to know and do is increasingly focused on “how to think” and the competencies needed for a Year 2035 workplace and society. As noted earlier, Year 2035 competencies include critical thinking, problem-solving, communications, information literacy, and learning how to learn. A New Education System school would be purposeful about identifying Year 2035 skills and the degree to which those skills are being demonstrated by their students. The school would then ensure students learned the relevant skills and competencies.
2. **The school, community, and family provide students with required experiences, not just specific courses.** Decades of research confirm what most parents already know: that a child’s experiences are inextricably linked to their knowledge, well-being, and emotional intelligence. It also adds to their perspective and ability to think critically. Thus, a new education system would not only give students instruction in core subjects, but also provide students key, relevant experiences that add to their understanding of their interests, varying perspectives, and the world.

3. **Learning happens everywhere and anytime.** A new education system must take advantage of the learning that can happen outside of the four walls of the school. Most learning may happen at school; however, when and where students learn can be much more variable and take into account student needs and degree of access. Students may be given “credit” for demonstrating attainment of necessary skills or competencies outside of the school building or outside of the normal school day.
4. **The school hires people or employs programs that can help students gain the necessary knowledge and skills.** An effective organization employs people who can help get the outcomes the organization values. And given that students will need competencies, skills,

and experiences beyond the traditional core subjects, a new education system will need to broaden its reach for qualified candidates and include people who can teach specific skills well even if they do not have a teaching certificate.

5. **The school is outcomes focused.** The organization's operations are tied to clear and measurable outcomes. Without clear and measurable outcomes (which should include academic and performance metrics), there can be no effective way to focus the work and prioritize resources. Unfortunately, the profession has moved away from outcomes, preferring to define success as the implementation of programs and initiatives whether there is an improvement of key outcomes (such as reading and math proficiency) or not.
6. **There is clear accountability at all levels for achieving outcomes.** Over the last two decades, "accountability" seems to have become pejorative, and educators have infused the current system with policies and practices that all but eliminate accountability. Ineffective teachers are protected by unions; many poor performing administrators are "kicked upstairs"; and district leaders are given new contracts even when student achievement remains unacceptably low. A new education system must embrace rigorous accountability measures. Success should be celebrated and rewarded; failure to achieve outcomes over time must have real consequences.
7. **Employee compensation is connected to what the system values most.** No organization can maximize its effectiveness if what it values is disconnected from how it compensates its employees. This is a basic system principle in most businesses, but is rarely used in education. A new education system values attainment of the agreed-upon outcomes and thus compensates employees largely based on the student achievement and performance outcomes. Compensation may also be differentiated based on the value of the skillset the employee brings to the organization.

No organization can maximize its effectiveness if what it values is disconnected from how it compensates its employees.

8. **Scarce resources are prioritized.** It is likely that any system will have to deal with a scarcity of resources. And just as with all effective organizations, those scarce resources should be prioritized in a way that will most effectively achieve the outcomes given the resources constraints. Perhaps the most important resource is the group of highly effective teachers in a school or district. If highly effective teachers are scarce, then they should be assigned to the lowest performing students.

Appendix B: TFS-Ready Characteristics

- You are prepared and have your lesson objective and DOL up before the start of each class.
- Your objectives and DOLs are aligned with the curriculum calendars, and they meet the criteria of effective objectives and DOLs.
- You differentiate activities into four levels every class period, every day!
- You administer your DOL and get students into their LSAE groups within 10 minutes – start to finish.
- You push out in time (between 40 and 50 minutes after the start of class).
- Your students are reading, writing, computing, or thinking 95% of the time.
- You don't waste time – transitions are smooth; you have breakout rooms ready to go, etc.
- You teach bell to bell.
- You are a teacher who is confident and effective!
- You manage the classroom well, ensuring students follow the three rules of the school.
- You teach grade-level content to every student every day.
- You push the rigor and relevance.
- You use a lot of visuals.
- You use a timer.

- You know where your students are academically and social-emotionally.
- You collaborate with your colleagues.
- You think about what it means to be in a high-performance culture and act in ways to strengthen it.

For classes with remote learners:

- Students conduct a “table talk” or breakout room at least twice during a 45-minute period.
 - Students are allowed to see and speak with one another in the breakout rooms.
 - Breakout room time for table talk is between 2 and 5 minutes long.
- Students complete a quick response card at least three times in a 45-minute period.
- Students mute themselves when the teacher is presenting.
- Remote learners keep their video turned on.
- A student who is answering a question or making a solicited comment turns on her mic.

Appendix C: TFS Spot Observation Form

 THIRD FUTURE <small>Learning for tomorrow's success</small>		TFS Spot Observation Form -- Core Subjects		<small>revised 21 Dec 2021</small>
Teacher:		Date:		
Gr./ Subject:		Time in:		
Observer:		Time out:		
Area	Instructional Characteristics			Pts. Awarded
Lesson Obj. and DOL	Objective aligns to curriculum maps and assessments			(0-1)
	Obj. provides focus and coherence to the lesson			
	Obj. is specific enough to be taught in 1 lesson			
	DOL is tied directly to the lesson objective and curriculum			
	DOL can be accomplished in 5 to 10 minutes			
Purposeful Instruction	Instruction and activities support the objective			(0-3)
	Instruction is relevant and engaging and delivered in a way that maximizes understanding			
	Direct instruction is at grade level and rigorous			
	Transitions are smooth with no loss of instructional time			
	Lessons are adjusted based on classroom response data			
	The teacher requires the students to read, write, or think the entire lesson			
Engage-	The teacher effectively uses multiple response strategies and uses an MRS every 4 min.			(0-3)
	There is 100% student participation			
	Teacher uses a variety of MRS strategies			
	Students annotate work when appropriate			
LSAE Model	Uses the LSAE model to differentiate instruction into four levels			(0-3)
	Separates students into appropriate groups for LSAE time			
	Work for each group is appropriately rigorous and tied to specific learning objectives			
	L's receive more direct instruction/extension of the lesson			
	Push-out occurs within 40 to 50 minutes of the start of the lesson			
Virtual Instruction	LSAE work includes minimum 500-word text or math story problems			0
	Effectively uses Zoom and Google classroom to provide strong instruction			
	The instruction for e-learning mirrors the high-quality of the in-class students			
	Uses tech. equip. to enhance student learning simultaneously in-person and remotely			
Follows the TFS instructional model for remote learners

Appendix D: Dyad requirements

Third and Fourth Grade Dyad Requirements			
Cognate	Course/experience	Required?	Notes
Core content	Reading/ writing	Yes	Each year
	Math	Yes	Each year
	Science	Yes	Each year
	Art of Thinking	Yes	Each year
Labs/ experiences	Activity week: exposure to dance, karate, soccer, musical instruments, basketball, volleyball, and performing arts	Yes	Must participate in three of the four activity weeks in two years
	Problem-solving projects	Yes	School-level or class-level projects
	Science and math labs	Yes	
	Museum of nature and science	Yes	
	Nature field trip	Yes	
	Performing arts or play a musical instrument	Yes	Taught by community
	Physical education or participate in a sport	Yes	Taught by community
	Other opportunity	No	
Electives (required electives taken in either 4th or 5th grade; may be taken in both grades)	Creation and innovation	No	
	Problem-solving and decision-making	Yes	Tied to problem-solving projects
	Communications and media	No	
	Virtual reality learning	No	
	Graphic design	No	
Service/ community	Computer science	No	
	Empathy	Yes	TBD
	Habits of Success	Yes	Proficient on rubric
	School level or class level projects	Yes	May complete a community project with permission

Fifth and Sixth Grade Dyad Requirements

Cognate	Course/experience	Required?	Notes
Core content	Reading/writing	Yes	Each year
	Math	Yes	Each year
	Science	Yes	Each year
	Art of Thinking	Yes	Each year
	Social Studies	Yes	two days a week; each year
	Physics	Yes	two days a week; each year
Labs/ experiences	Activity week: exposure to dance, karate, soccer, musical instruments, basketball, volleyball, and performing arts	No	Two times a year
	Problem-solving projects	Yes	School-level or neighborhood projects (collaborate with community organizations)
	Science and math labs	Yes	Tied to physics curriculum
	Museum of nature and science	No	
	The Arts field trip	No	
	Business or policy field trip	No	Collaborate with community organizations
	Trip to another part of the U.S.	Yes	Once during either the 5th- or 6th-grade year
	Performing arts	Yes	Taught by community
Electives <small>(required electives taken in either 5th or 6th grade; may be taken in both grades)</small>	Health and fitness or team sports	Yes	Taught by community
	Creation and innovation	Yes	Individual or group projects
	Problem-solving and decision-making	Yes	Tied to problem-solving projects
	Study of cultures	No	
	Foreign language	No	
	Communications and media	Yes	Collaborate with community organizations
	Virtual reality learning	Yes	Must complete two of these three courses
Graphic design	Yes		
Computer science	Yes		
Service/ community	Empathy	Yes	TBD
	Habits of Success	Yes	Proficient on rubric
	Neighborhood service projects	Yes	Must complete neighborhood or city service project or activity
	City projects		

Seventh and Eighth Grade Dyad Requirements

Cognate	Course/experience	Required?	Notes
Core content	Reading/ writing	Yes	Each year
	Math	Yes	Each year
	Science	Yes	Each year
	Art of Thinking	Yes	Each year
	Social Studies	Yes	two days a week; each year
	Physics	Yes	two days a week; each year
Labs/ experiences	Activity week: exposure to dance, karate, soccer, musical instruments, basketball, volleyball, and performing arts	No	Two times a year
	Problem-solving projects	Yes	School-level or neighborhood projects (collaborate with community organizations)
	Science and math labs	Yes	Tied to physics curriculum
	Museum of nature and science	No	
	Business or policy field trip	Yes	Collaborate with community organizations
	Environmental field trip	Yes	
	Trip to another part of the U.S.	Yes	Once during either the 7th- or 8th-grade year
	Trip to another Country	Yes	Once during either the 7th- or 8th-grade year
	Performing arts	Yes	Taught by community
Participation in a team sport	Yes	Taught by community	
Electives (required electives taken in either 7th or 8th grade; may be taken in both grades)	Creation and innovation	Yes	Individual or group projects
	Problem-solving and decision-making	Yes	Tied to problem-solving projects
	Study of cultures	Yes	
	Foreign language	No	
	Communications and media	Yes	Collaborate with community organizations
	Virtual reality learning	Yes	Must complete part II of one of these three courses
	Graphic design	Yes	
Computer science	Yes		
Service/ community	Habits of Success	Yes	Proficient on rubric
	Neighborhood service projects	Yes	Must complete neighborhood or city service project or activity
	City projects		

Appendix E: Learning How to Learn Rubric

Skill	Emerging	Progressing	Proficient
Understands his learning profile	<ul style="list-style-type: none"> • Understands both her strengths and areas for improvement • Knows what distracts her from learning, but sometimes does not avoid those distractions • Unclear about the activities or topics that will hold her interest • Reflects on her growth and on areas that need improvement 	<ul style="list-style-type: none"> • Understands both her strengths and areas for improvement • Selects a learning environment relatively free from things that will distract her • Chooses activities, materials, or topics that hold her interest • Reflects on her growth and on areas that need improvement 	<ul style="list-style-type: none"> • Can articulate both her strengths and areas for improvement • Uses knowledge of her learner profile to enhance learning • Selects a learning environment relatively free from things that will distract her • Chooses activities, materials, or topics that hold her interest • Reflects on her growth and on areas that need improvement and makes a plan to improve
Manages time	<ul style="list-style-type: none"> • Pays attention to time to complete a task • Sometimes has trouble focusing or staying on task • Works at an inconsistent pace: sometimes works too slow or sometimes races through the material without learning the material well 	<ul style="list-style-type: none"> • Pays attention to time to complete a task and usually finishes on time • Works at a pace that supports learning <ul style="list-style-type: none"> ◦ Does not work too slow, nor race through the task • Does not procrastinate • Focuses on the task at hand 	<ul style="list-style-type: none"> • Allows sufficient time to accomplish the task or assignment • Accurately predicts how long a task will take to complete • Does not procrastinate • Works at a pace that supports thorough understanding <ul style="list-style-type: none"> ◦ Does not work too slow, nor race through the task • Focuses on the task at hand • Pays attention to time left to complete the task • Can prioritize tasks or subtasks
Establishes goals	<ul style="list-style-type: none"> • When guided, creates short-term and long-term goals • Creates SMART goals; may have difficulty making the goals measurable • Needs help creating goals that will take advantage of areas of strength or address areas of weaknesses 	<ul style="list-style-type: none"> • Creates a short-term goal; may need help breaking up large goals or long-term goals into smaller, more discrete objectives • Creates SMART goals, but needs help making the goals challenging • Establishes goals that are relevant and addresses areas of strength or weaknesses of the learner profile 	<ul style="list-style-type: none"> • Establishes challenging, but realistic goals • Creates “SMART” goals • Establishes goals that are relevant and addresses areas of strength or weaknesses of the learner profile • Adjust goals as appropriate based on progress or new information • Can break up large goals into smaller, more discrete objectives

Skill	Emerging	Progressing	Proficient
Uses available resources	<ul style="list-style-type: none"> Asks for help when stuck Takes the initiative to find resources, material, or people to help move the learning process forward (as appropriate) Needs help to expand repertoire of resources that can assist in learning Needs help understanding the differences among resources and how they contribute to accomplishing the task at hand 	<ul style="list-style-type: none"> Asks for help when stuck Takes the initiative to find resources, material, or people to help move the learning process forward (as appropriate) Uses familiar resources to assist in learning; may not continue to seek more effective or more helpful resources Needs help understanding the differences among resources and how they contribute to accomplishing the task at hand 	<ul style="list-style-type: none"> Asks for help when stuck Takes the initiative to find resources, material, or people to help move the learning process forward (as appropriate) Uses a variety of resources to assist in learning Understands the differences among resources and how they contribute to accomplishing the task at hand
Collaborates with peers when appropriate	<ul style="list-style-type: none"> Does not distract others from getting the group work done Listens to what others are saying, but does not listen actively nor try to understand the ideas of others Is unsure how to support others in their learning Sometimes does not engage positively 	<ul style="list-style-type: none"> Works well with peers on group projects or assignments Listens well and tries to understand the ideas of others Is unsure how to support others in their learning Engages positively, but may not understand or directly try to support the goals of the group 	<ul style="list-style-type: none"> Works well with peers on group projects or assignments Listens well and tries to understand the ideas of others Supports others in their learning Contributes to the goals of the group and engages positively
Monitors his progress	<ul style="list-style-type: none"> Understands the tasks at hand, but is unclear how much growth needs to be made With guidance, monitors progress toward goal accomplishment, but needs help to gather and/or analyze the information Is unclear how to adjust work or behavior as a result of monitoring progress 	<ul style="list-style-type: none"> Understands what success looks like and how much growth needs to be made Monitors progress toward goal accomplishment, but needs help to gather and/or analyze the information Is unclear how to adjust work or behavior as a result of monitoring progress 	<ul style="list-style-type: none"> Understands what success and excellence looks like and how much growth needs to be made Monitors progress toward goal accomplishment Uses a system to track progress regularly and frequently Adjusts work and behavior as a result of monitoring progress
Follows habits of success	<ul style="list-style-type: none"> Follows the school habits of success and is “learning” on the HOS rubric Fills out the habits of success self-assessment, but is not thoughtful about areas to improve or steps to take to improve 	<ul style="list-style-type: none"> Follows the school habits of success and is “securing” on the HOS rubric Assesses individual habits of success regularly, but may not follow through or take specific steps to improve 	<ul style="list-style-type: none"> Follows the school habits of success and is “accelerated” on the HOS rubric Assesses individual habits of success regularly and makes a plan to improve
